

"I am wheelchair bound and need assistance. What are my options for home care, renovations and financial support?"

"My dad needs all kinds of help at home every day. Who can book these services and help complete the forms to help pay for the cost?"

"My mother-in-law needs triple bypass surgery. How do I ensure she gets the right care and support after she is released from the hospital?"

The Seniors' Care Assistance Program™

OTIP offers retiree health plan members access to the The Seniors' Care Assistance Program, provided by Bayshore HealthCare. This is the only service in Canada that connects you and your family to a registered nurse who specializes in senior care assistance. Bayshore HealthCare will help you navigate the senior support services that are available, assist you in making important decisions and ensure that you and your loved ones receive the proper care every time.

CONNECT - to publically funded senior care resources such as prescription drug financial support programs, home and community care services, assistive devices, and home renovation grants.

ACCESS - to any senior care and support services. Bayshore HealthCare will contact physicians, hospitals or other providers personally to book appointments, help gather medical records and other information required and assist with completing the forms for services, funding or rebates.

CARE - to ensure that services, such as companionship, personal care, nursing, meal preparation, light house keeping, home retrofit and meal deliveries are assessed and approved by Bayshore HealthCare and provided by organizations that you and your family can trust.*

Why Bayshore HealthCare?

Bayshore HealthCare enhances the quality of life, independence and dignity of over 100,000 Canadians in their homes each year. With over 60 home health locations across Canada and 10,000 employees, Bayshore ensures they receive the care they need, when they need it.
